FINISHING BORDER & EAR LOOP

1. Slip stitch into next stitch.
2. SC around long edge of the mask to the short end.
3. Slip stitch on corner.
4. Chain 12 for ear band (may adjust chain for fit)
5. Attach chain to other side of the short chain with a slip stitch. (this makes the ear loop).
6. **Repeat 2 – 5** to finish other side and create second ear loop.
7. **Finish off** at corner and weave edges in.

Note: You can adjust this pattern to make multiple sizes. Just add a longer foundation and more rows. Make sure you begin with an odd number.

Finished adult size is about 10 inches long and 5 inches wide.

FILTER POCKETS

Add a simple square of 20 chain by 10 row SC square to the backside and attach on row edge to the long edges of the mask to create a crochet pocket for a filter, or sew in a thin cotton fabric pocket to the backside of the mask to provide an extra filter.

This mask should not replace medical grade masks, but can be used as personal PPE when you are out in public to prevent the release of personal aspirations. Disinfect after use.
